

Applied Medical

Corporate Social Responsibility Policy

Applied Medical is a global medical device manufacturer with corporate headquarters in Southern California and European headquarters in The Netherlands. We are proud of our strong commitment to ethical business practices and behavior, as well as the belief that quality, compliance and social accountability are everyone's responsibility.

Applied Medical is dedicated to continually enhancing our corporate social responsibility programs and initiatives to further strengthen the balance of our social, environmental and economic impacts. We actively pursue strategies that advance our sustainability endeavors and make a positive impact on the people and communities where we work.

As a vertically integrated company, we are able to accomplish our goals through deep engagement in our processes. We produce the vast majority of our products, services, and high-efficiency energy internally and where our direct teams and customers reside. By doing this, we minimize any negative impact to quality or the environment.

We uphold the highest standards in all facets of our business, in compliance with our ethical standards and applicable labor laws, environmental regulations, and conventions put forth by the United Nations and the International Labor Organization, while expecting the same from our critical suppliers, partners and vendors.

It's all part of our mission to make a meaningful, positive difference every day in everything we do around the world.
